

LITHIUM COMPLEX 2

PRODUCT DESCRIPTION

A specially developed multi-purpose lithium complex grease recommended for use in heavy- and light-duty applications in manufacturing facilities, automobiles, agricultural and construction equipment. Applications include, but are not limited to, roller bearings, plain bearings, thrust bearings, gears, electric motors, presses, winches, bushings, wheel bearings, chassis lubrication, universal joints, ball joints, tie-rod ends and steering knuckles.

BENEFITS

- ✓ Highly versatile
- ✓ Good oxidation stability provides lasting lubrication at high temperatures >150°C
- ✓ Excellent extreme pressure (resistant to weld loads >450 kg) and anti-wear performance
- ✓ Exceptional mechanical stability extends relubrication intervals
- ✓ Good water resistance protects components from corrosion operating in wet conditions
- ✓ No adverse effect on sealings

USAGE

Follow the recommendations from the equipment and / or bearing manufacturer. Check compatibility with the grease applied previously and if necessary purge bearings or clean the application area prior to application. Do not over-lubricate.

DOSAGE

To be used whenever required.

GREASES

Packaging details

Art. No.:	68770
Content:	400 gr
Packaging:	12x400 gr
Pallet:	97 cartons
Languages:	EN, DE, FR, ES

Technical specifications

Performance level DIN 51825:	KP 2 N-20
Thickener:	Lithium complex
Odour:	Characteristic
Colour:	Blue
