

## LITHIUM MOLY EP 2

### PRODUCT DESCRIPTION

A specially developed premium multi-purpose grease with molybdenum disulphide imparts recommended for use in heavy- and medium-duty applications found in manufacturing facilities, automobiles, earthmoving and agricultural machinery and construction equipment. Applications include, but are not limited to, heavily loaded bearings, gears, presses, winches, bushings, chassis lubrication, universal joints, ball joints, tie-rod ends and steering knuckles.

### BENEFITS

- ✓ Excellent performance and wear protection against shock loading and dusty environments
- ✓ Excellent extreme pressure (resistant to weld loads > 315 kg) and anti-wear performance
- ✓ Exceptional mechanical stability extends relubrication intervals
- ✓ High degree of corrosion protection
- ✓ No adverse effects on sealing

### USAGE

Follow the recommendations from the equipment and / or bearing manufacturer. Check compatibility with the grease applied previously and if necessary purge bearings or clean the application area prior to application. Do not over-lubricate.

### DOSAGE

To be used whenever required.

## GREASES

### Packaging details

Art. No.:	68772
Content:	400 gr
Packaging:	12x400 gr
Pallet:	97 cartons
Languages:	EN, DE, FR, ES

### Technical specifications

Performance DIN 51825:	KPF 2 N-20
Thickener:	Lithium complex
Odour:	Characteristic
Colour:	Grey / Black
